

This special issue of the SKASE Journal of Theoretical Linguistics brings to our readers some of the papers presented at the Word Formation Theories workshop, held in Presov, 25-26 June, 2005. In particular, they are papers which comment on corresponding chapters of the Handbook of Word Formation (edited by P. Štekauer and R. Lieber, published by Springer, Dordrecht in 2005). The author(s) and the title of the corresponding Handbook chapter are referred to under the title of the individual contributions.
